

Governors Report Autumn Term 2014

In May 2014, the school's Governing Body and committee structure was re-organised to reflect better the needs of the school.

Governors have worked hard to establish clear links between governors and those leading key areas of the school improvement plan so that they are in a good position to hold school leaders to account.

We are building face to face links with parents, pupils, school leaders and other staff to understand better how well the school is doing. Listening to the views of parents and pupils are an important part of this, and we encourage parents and pupils to talk to members of the governing body.

We are checking regularly the progress that pupils are making and comparing their progress with that made by pupils elsewhere in the country. All this is to ensure that the pupils of Holbrook Primary achieve as well as they possibly can and are safe and happy in their learning.

The school governors are extremely pleased with the very positive findings of the latest visit from **Ofsted** in **June 2014**. The school's **success** and **determination** in implementing improvement plans was acknowledged, including the **positive role of governors** in that. The record of pupils' **achievements** at the end of the school year in **July 2014** reflects that **considerable improvement**.
